

AUTOMATION TESTING

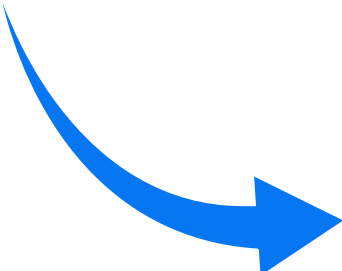

Certification Training

StarX Placement Program

About the Course

- » This Automation Testing Certification Course is designed to equip you with the skills and knowledge you need to become an expert in automation testing. In today's digital world, automation testing is a critical skill for software testing professionals to have, and we are committed to helping you learn it in the most effective way possible. This course is designed in such a way that the trainers teach everything from scratch and candidates from any background can make the most out of it.

Program Highlights

- 
- ▶ 4 Months of Intensive Online Training
 - ▶ Delivered by industry experts
 - ▶ 100+ Hours of Practical Assignments
 - ▶ Dedicated Mentor for Instant Doubt Clarification
 - ▶ 6 Months Internship Certificate
 - ▶ Hands-On Assignment for Each Module
 - ▶ Assured Minimum Package 5-25 LPA

Skills You will learn

- ▶ Understanding of software testing concepts and methodologies.
- ▶ Knowledge of various types of testing, including functional, regression, and security testing.
- ▶ Ability to write and execute automated test scripts using tools like Selenium, and Appium.
- ▶ Familiarity with programming languages such as Java.
- ▶ Understanding of version control systems like Git and SVN.
- ▶ Ability to design and implement test automation frameworks.
- ▶ Knowledge of continuous integration and continuous delivery (CI/CD) workflows.
- ▶ Ability to analyze test results and provide insights to improve the software development process.

StarX Placement Program

- » Introducing StarAgile's StarX Placement Program where you can now advance your career with a sense of security and reliability. This program allows you to secure a placement in a top MNC and pay the Career Services Fee only after your successful placement.
- » After completing the course, you can opt for our placement services by signing an income-sharing agreement and passing the other eligibility Criteria.
- » We will then help you get placed in top Companies by providing you with 4+ interviews every month and job training till you get the job. Once you are placed, you need to pay INR 80,000 as a Career Services Fee to StarAgile. You can also pay the amount in easy 12 months EMI.

How Does StarX Placement Program Work?

01

Enroll for the course by paying the training fee

Eligibility Criteria for StarAgile Placement Program

Why Automation Testing?

Sure, here are some reasons why an individual should consider automation testing as a career:

High Demand 01

Automation testing is in high demand in the software industry, as more and more companies are shifting towards automation to improve their software testing efficiency. According to a report by MarketsandMarkets, the global market for test automation is expected to grow from \$12.6 billion in 2018 to \$28.8 billion by 2023, at a compound annual growth rate (CAGR) of 18.0%.

Salary 02

Automation testers are highly paid professionals in the software industry. According to Glassdoor, the national average salary for an Automation Tester in the United States is \$83,000 per year. The salary can vary based on experience, location, and company size.

Career Growth 03

Automation testing provides ample opportunities for career growth. Testers can advance to roles such as Test Automation Engineer, Test Manager, or even Software Developer with automation testing skills. According to a report by Indeed, Test Automation Engineers can earn up to \$127,000 per year.

Time-Saving

04

Automation testing saves a lot of time in software testing. Test automation can run scripts repeatedly and quickly, which can free up time for manual testers to focus on other tasks. This not only speeds up the testing process but also reduces the overall testing cost.

Improved Quality

05

Automation testing provides ample opportunities for career growth. Testers can advance to roles such as Test Automation Engineer, Test Manager, or even Software Developer with automation testing skills. According to a report by Indeed, Test Automation Engineers can earn up to \$127,000 per year.

“The Numbers Speak Louder Than Affirmations”

According to a report by Technavio, the global test automation market is expected to grow by **\$ 17.9 billion** during **2020-2024**, at a CAGR of over **15%**.

The average salary for an Automation Tester in the United States is **\$83,000 per year**, according to Glassdoor.

According to a report by LinkedIn, Test Automation Engineer is one of the top emerging jobs in the United States with a **123%** annual growth rate.

According to a report by Indeed, the average salary for a Test Automation Engineer in the United States is **\$93,000 per year**, with the highest salary being **\$127,000 per year**.

According to a report by Sauce Labs, **50%** of companies are using test automation as part of their software testing strategy.

According to a report by IBM, automation testing can reduce testing time by up to **80%** and increase testing accuracy by up to **85%**.

After the Course, You will be able to

- Develop and execute automated test scripts.

- Use automation tools such as Selenium, Appium to perform various types of testing, including functional, regression.

- Improve the efficiency and effectiveness of the software testing process.

- Debug issues and identify defects in software applications using automated testing.

- Build robust and reliable test automation frameworks to support agile development methodologies.

- Implement continuous integration and continuous delivery (CI/CD) workflows to streamline the software development process.

- Design and implement testing strategies for complex software projects.

- Advise and consult with other team members on testing best practices and methodology

Who Can Attend

- ▶ Software Testing Professionals
- ▶ Software Developers
- ▶ QA Engineers
- ▶ Individuals interested in a career in software testing and QA
- ▶ Software Architects
- ▶ Project Managers
- ▶ Entrepreneurs
- ▶ Software Engineers
- ▶ IT Professionals
- ▶ Software Testers
- ▶ Users of open-source testing tools such as Selenium, and Appium.
- ▶ Individuals interested in learning how to write automation scripts use automation tools such as Selenium, API, Jenkins, CI/CD, and Appium to perform various types of testing, including functional and regression testing.

Certificates

(Course Completion Certificate)

(Internship Certificate)

Eligibility

- » The course is open to anyone who has a valid degree or is pursuing one. No prior experience in automation testing is required, and the course is suitable for beginners as well as professionals looking for a promising career in the field of Automation Testing.

Why StarAgile?

- ✓ 300K+ Professionals Trained
- ✓ 97.2% Success Ratio
- ✓ 24/7 Learning Support
- ✓ Risk-Free Learning
- ✓ Your Career Our Responsibility
- ✓ Flexible Payment Options
- ✓ 10,000+ Career Transformed(2022-2023)
- ✓ Weekly Mentorship Sessions
- ✓ Simplified Enrollment Process - No Tests, No Hassles
